

Consolidated List of Products Whose Consumption and/or Sale Have Been Banned, Withdrawn, Severely Restricted or not Approved by Governments: Pharmaceuticals

The eighth issue of this publication lists restrictive regulatory actions taken by 112 governments in relation to pharmaceutical products, in response to General Assembly resolutions aimed at protecting the environment and human health against harmful products. It contains regulatory information, given under common scientific names, including references to relevant legal documents; as well as commercial information, including trade names. (Please note that issues alternate between coverage of pharmaceuticals and coverage of agricultural and industrial chemicals, so any set of two consecutive issues will provide complete coverage).
