

In Other Words: Variation in Reference and Narrative (Studies in Interactional Sociolinguistics)

Deborah Schiffrin looks at two important tasks of language--presenting who we are talking about (the referent) and what happened to them (their actions and attributes) in a narrative--and explores how this presentation alters in relation to emergent forms and meanings. Drawing on examples from both face-to-face talk and public discourse, she analyzes a variety of repairs, reformulations of referents, and retellings of narratives, ranging from word-level repairs within a single turn-at-talk, to life story narratives told years apart.
