

This book examines the origins, development and fate of intelligent species in the observable part of our universe. It scrutinizes what kind of information about extraterrestrial intelligent life can be inferred from our own biological, cultural and scientific evolution and the likely future of mankind. There is emphasis on the geological conditions and consequences of life's conquest of land as the pre-condition for the emergence of life with our type of technical intelligence.

Thermochromic Phenomena in Polymers, Under the Circumstances: A Story of Triumph After Tragedy, Recent Progress in Fourier Analysis, Nanoskalige optische Fasern: Über Führungs- und Feldeigenschaften und deren Einsatz bei der Superkontinuumserzeugung (German Edition), Intensive Basic Latin: A Grammar and Workbook (Grammar Workbooks), Laser Resonators and Beam Control VI (Proceedings of SPIE), MEMS and Nanotechnology, Volume 5: Proceedings of the 2013 Annual Conference on Experimental and Applied Mechanics (Conference Proceedings of the Society for Experimental Mechanics Series),
