

Goringer's brilliant new work dedicates a chapter to each of the main types of RNA editing – the very first volume to do so. All of the sections here have been written by experts in the various research areas and a specific focus is put on the correlation between RNA structure and function, as well as on the complex cellular machineries that catalyze the different editing reactions. This leads to a state of the art compendium of our current knowledge on RNA editing.

Origins of Life, Frondes Agrestes: Readings in Modern Painters, Differential Equations, Textbook and Student Resource Manual: A Modeling Perspective, Forget Strategy. Get Results.: Radical Management Attitudes That Will Deliver Outstanding Success, Midlatitude Ionospheric Dynamics and Disturbances: 181 (Geophysical Monograph Series), Shadow Worlds, Le roi samuse: Flute 2 part (Qty 2) [A1404], Talking Back to OCD 1st (first) edition Text Only, A History of the Papacy from the Great Schism to the Sack of Rome, Volume 4,
